Description of Institution's Operations in New York-Newark-Jersey City, NY-NJ MMSA

Hana Bank provides commercial banking services with a concentration in small business lending and retail banking, primarily to Korean American and broader Asian American communities in the New York and New Jersey metropolitan areas. Hana Bank has designated its AA as Bergen, Essex, Hudson, Passaic, and Union counties in NJ and Bronx, Kings, Nassau, New York, Queens, and Westchester counties in NY. All 11 counties are part of the New York-Newark-Jersey City, NY-NJ MMSA. Eight of the designated counties are located within the New York-Jersey City-White Plains, NY-NJ metropolitan division (MD) 35614; two in the Newark, NJ MD #35084; and one in the Nassau County-Suffolk County, NY MD 35004. The AA consists of 3,565 census tracts surrounding the bank's three full-service branches located in Fort Lee, NJ, New York, NY, and Flushing, NY. Of the 3,565 census tracts, 12.3 percent are low-income geographies, 22.6 percent are moderate-income geographies, 29.6 percent are middle income geographies, 30.7 percent are upper-income tracts, and 4.8 percent have not been assigned an income classification. The AA meets the requirements of the CRA and does not arbitrarily exclude low and moderate-income geographies.

Hana Bank operates in a highly competitive financial services market, competing for both deposits and loans. According to the June 30, 2024 Federal Deposit Insurance Corporation's (FDIC) Deposit Market Share Report, Hana Bank ranked 92nd out of 138 banks in deposit market share inside of the AA at 0.02 percent. Significant competitors for deposits include large banks and multinational institutions such as JPMorgan Chase Bank, N.A., Goldman Sachs Bank USA, The Bank of New York Mellon, Morgan Stanley Private Bank, N.A., and Bank of America, N.A. These major competitors have an established presence in the AA and provide strong competition with a combined deposit market share of 68.0 percent. With respect to small business loans, there were 277 reporting lenders in the New York-Newark-Jersey City, NY-NJ MSA based on 2023 CRA Aggregate Market Share Data. The top two lenders in the MSA were American Express National Bank and JPMorgan Chase Bank, N.A. with a combined market share of 66.2 percent by number of loans. The average loan sizes for these lenders were $16 thousand and $17 thousand, respectively, as the majority of their small business loans are made through credit cards. Hana Bank did not originate enough small business loans to demonstrate any market share in the MSA. However, during 2023, Hana Bank's average small business loan in the AA

was $472 thousand. Additionally, Hana Bank competes with other Korean American community banks within its AA, notably Woori America Bank and New Millennium Bank.

The New York-Jersey City-White Plains, NY-NJ MD, which makes up a majority of the AA, is experiencing a mild economic expansion. The annual unemployment rate in this MD remained stable during the evaluation period, ranging from 4.7 to 4.8 percent. As of December 2024, the unemployment rate in the MD was 4.9 percent, which was above the national unemployment rate of 4.1 percent. Significant industries in the area providing employment include education and health services, professional and business services, government, and financial activities. Of the top 13 employers in the MD, four are financial institutions, six are hospitals or health systems, two are universities, and one is a retail department store. Major employers in the area include JPMorgan Chase & Co., New York-Presbyterian Healthcare System, Mount Sinai Health System, NYC Health + Hospitals, and Montefiore Health System.

To determine local economic conditions and community needs, the OCC reviewed information from three community development organizations serving the bank's AA: one which supports affordable housing for low- and moderate-income individuals and two that provide community services to low- and moderate-income individuals. These contacts identified affordable housing, financial literacy initiatives, and more flexible financing programs as the greatest community needs.

LENDING TEST

The bank's performance under the Lending Test in the New York-Newark-Jersey City, NY-NJ MMSA is rated Satisfactory.

Based on a full-scope review, the bank's performance in the New York-Newark-Jersey City, NY-NJ MMSA was reasonable.

Distribution of Loans by Income Level of the Geography

The bank exhibited reasonable geographic distribution of loans in the MMSA.

Small Loans to Businesses

Refer to Table 9 in appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses.

The distribution of the bank's small loans to businesses in low- and moderate-income geographies was reasonable. The proportion of loans originated in low-income geographies was below the proportion of businesses in low-income geographies and below the aggregate distribution of loans in low-income geographies. The proportion of loans originated in moderate-income geographies was well below the proportion of businesses in moderate-income geographies and well below the aggregate distribution of loans in moderate-income geographies. Hana Bank's performance was considered reasonable as the bank had a very limited presence in the market relative to the largest depository and lending institutions. The highly competitive market constrained Hana Bank's ability to lend in low- and moderate-income geographies where fewer businesses were located.

Distribution of Loans by Income Level of the Borrower

The bank exhibited a reasonable distribution of loans to businesses of different sizes, given the product lines offered by the bank.

Small Loans to Businesses

Refer to Table 10 in appendix D for the facts and data used to evaluate the borrower distribution of the bank's originations and purchases of small loans to businesses.

The distribution of the bank's small loans to businesses was reasonable. The proportion of loans to businesses with revenues of $1 million or less was below the proportion of those businesses in the AA but near to the aggregate distribution of loans to those businesses. Although Hana Bank's performance was below aggregate industry performance, this was largely due to significant competition from American Express National Association and JPMorgan Chase Bank, N.A. in the small business lending market. The majority of these lenders' small business loans were small dollar and made through credit cards. As a result, the aggregate distribution does not reflect the performance of more traditional small business loan products offered by the bank. Hana Bank originated small business loans in much larger amounts, reflecting more permanent investment in its AA.

Responses to Complaints

The bank did not receive any complaints regarding its CRA performance during the evaluation period.

Also, the median income determined by the Federal Financial Institutions Examination Council (FFIEC) annually that is used to determine the income level category of individuals. For any given area, the median is the point at which half of the families have income above, and half below, a range of incomes.

Metropolitan Division: As defined by Office of Management and Budget, a county or group of counties within a Core Based Statistical Area that contains an urbanized population of at least 2.5 million. A Metropolitan Division consists of one or more main/secondary counties that represent an employment center or centers, plus adjacent counties associated with the main/secondary county or counties through commuting ties.

Metropolitan Statistical Area: An area, defined by the Office of Management and Budget, as a core based statistical area associated with at least one urbanized area that has a population of at least 50,000. The Metropolitan Statistical Area comprises the central county or counties containing the core, plus adjacent outlying counties having a high degree of social and economic integration with the central county or counties as measured through commuting.

Middle-Income: Individual income that is at least 80 percent and less than 120 percent of the area median income, or a median family income that is at least 80 percent and less than 120 percent, in the case of a geography

Moderate-Income: Individual income that is at least 50 percent and less than 80 percent of the area median income, or a median family income that is at least 50 percent and less than 80 percent, in the case of a geography.

Multifamily: Refers to a residential structure that contains five or more units**.**

Multistate Metropolitan Statistical Area (MMSA): Any multistate metropolitan statistical area or multistate combined statistical area, as defined by the Office of Management and Budget.

Owner-Occupied Units: Includes units occupied by the owner or co-owner, even if the unit has not been fully paid for or is mortgaged.

Prior Period Investments: Investments made in a previous evaluation period that are outstanding as of the end of the evaluation period.

Qualified Investment: A qualified investment is defined as any lawful investment, deposit, membership share, or grant that has as its primary purpose community development.

Rating Area: A rated area is a state or multistate metropolitan statistical area. For an institution with domestic branches in only one state, the institution's CRA rating would be the state rating. If an institution maintains domestic branches in more than one state, the institution will receive a rating for each state in which those branches are located. If an institution maintains domestic branches in two or more states within a multistate metropolitan statistical area, the institution will receive a rating for the multistate metropolitan statistical area.

Small Loan(s) to Business(es): A loan included in 'loans to small businesses' as defined in the Consolidated Report of Condition and Income (Call Report) instructions. These loans have original amounts of $1 million or less and typically are either secured by nonfarm or nonresidential real estate or are classified as commercial and industrial loans.

Small Loan(s) to Farm(s): A loan included in 'loans to small farms' as defined in the instructions for preparation of the Consolidated Report of Condition and Income (Call Report). These loans have

original amounts of $500,000 or less and are either secured by farmland or are classified as loans to finance agricultural production and other loans to farmers.

Tier 1 Capital: The total of common shareholders' equity, perpetual preferred shareholders' equity with non-cumulative dividends, retained earnings and minority interests in the equity accounts of consolidated subsidiaries.

Unfunded Commitments: Legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

Upper-Income: Individual income that is at least 120 percent of the area median income, or a median family income that is at least 120 percent, in the case of a geography.

Appendix D: Tables of Performance Data

Content of Standardized Tables

A separate set of tables is provided for each state. All multistate metropolitan statistical areas, if applicable, are presented in one set of tables. References to the "bank" include activities of any affiliates that the bank provided for consideration (refer to appendix A: Scope of the Examination). For purposes of reviewing the Lending Test tables, the following are applicable: (1) purchased are treated as originations; and (2) "aggregate" is the percentage of the aggregate number of reportable loans originated and purchased by all HMDA or CRA-reporting lenders in the MMSA/AA. Deposit data are compiled by the FDIC and are available as of June 30th of each year. Tables without data are not included in this PE.

The following is a listing and brief description of the tables included in each set:

Table 9. **Assessment Area Distribution of Loans to Small Businesses by Income Category of the Geography** - The percentage distribution of the number of small loans (less than or equal to $1 million) to businesses that were originated and purchased by the bank in low-, moderate-, middle-, and upper-income geographies compared to the percentage distribution of businesses (regardless of revenue size) in those geographies. Because aggregate small business data are not available for geographic areas smaller than counties, it may be necessary to compare bank loan data to aggregate data from geographic areas larger than the bank's AA.

Table 10. **Assessment Area Distribution of Loans to Small Businesses by Gross Annual Revenue** - Compares the percentage distribution of the number of small loans (loans less than or equal to $1 million) originated and purchased by the bank to businesses with revenues of $1 million or less to: 1) the percentage distribution of businesses with revenues of greater than $1 million; and, 2) the percentage distribution of businesses for which revenues are not available. The table also presents aggregate peer small business data for the years the data is available.

2 Place label color corresponds to the place fill color.

3 Census tracts are identified by an up to four-digit integer number and may have an optional two-digit suffix; for example 23 or 1457.02. The census tract codes consist of six digits with an implied decimal between the fourth and fifth digit corresponding to the basic census tract number, but with leading zeros, and trailing zeros for census tracts without a suffix. The tract number examples above would have codes of 002300 and 145702, respectively.

2 Place label color corresponds to the place fill color.

3 Census tracts are identified by an up to four-digit integer number and may have an optional two-digit suffix; for example 23 or 1457.02. The census tract codes consist of six digits with an implied decimal between the fourth and fifth digit corresponding to the basic census tract number, but with leading zeros, and trailing zeros for census tracts without a suffix. The tract number examples above would have codes of 002300 and 145702, respectively.

Where international, state, county, and/or MCD/CCD boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

Geographic area names are followed by either their FIPS or census code.

1 A ' ° ' following an MCD name denotes a false MCD. A ' ° ' following a place name indicates that a false MCD exists with the same name and FIPS code as the place; the false MCD label is not shown.

2 Place label color corresponds to the place fill color.

3 Census tracts are identified by an up to four-digit integer number and may have an optional two-digit suffix; for example 23 or 1457.02. The census tract codes consist of six digits with an implied decimal between the fourth and fifth digit corresponding to the basic census tract number, but with leading zeros, and trailing zeros for census tracts without a suffix. The tract number examples above would have codes of 002300 and 145702, respectively.

Due to space limitations, some road names, along with other feature and geography names on the map, may not be shown.

Where international, state, county, and/or MCD/CCD boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

Geographic area names are followed by either their FIPS or census code.

1 A ' ° ' following an MCD name denotes a false MCD. A ' ° ' following a place name indicates that a false MCD exists with the same name and FIPS code as the place; the false MCD label is not shown.

2 Place label color corresponds to the place fill color.

3 Census tracts are identified by an up to four-digit integer number and may have an optional two-digit suffix; for example 23 or 1457.02. The census tract codes consist of six digits with an implied decimal between the fourth and fifth digit corresponding to the basic census tract number, but with leading zeros, and trailing zeros for census tracts without a suffix. The tract number examples above would have codes of 002300 and 145702, respectively.

Where international, state, county, and/or MCD/CCD boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

Geographic area names are followed by either their FIPS or census code.

1 A '*' following an MCD name denotes a false MCD. A '*' following a place name indicates that a false MCD exists with the same name and FIPS code as the place; the false MCD label is not shown.

2 Place label color corresponds to the place fill color.

3 Census tracts are identified by an up to four-digit integer number and may have an optional two-digit suffix; for example 23 or 1457.02. The census tract codes consist of six digits with an implied decimal between the fourth and fifth digit corresponding to the basic census tract number, but with leading zeros, and trailing zeros for census tracts without a suffix. The tract number examples above would have codes of 002300 and 145702, respectively.

Due to space limitations, some road names, along with other feature and geography names on the map, may not be shown.
